Portfolio: edgar-portfolio.vercel.app

PROFESSIONAL PROFILE

Full Stack Developer with 5+ years of experience architecting scalable web platforms. Specialized in high-performance Frontend development using React, Next.js, and TypeScript, with strong competency in Backend infrastructure (Node.js, PostgreSQL, Docker). Expert in refactoring legacy systems and building Component Libraries. Proven track record of reducing operational costs by creating custom software solutions.

TECHNICAL SKILLS

Languages & Scripting: JavaScript (ES6+), TypeScript, Bash/Shell Scripting, HTML5, CSS3.

Frontend Core: React.js, Next.js (App Router), Redux, Context API, Tailwind CSS, Material UI, Component Library Design, GraphQL (Apollo), Native (Basics).

Backend & Infra: Node.js, Express, NestJS, PostgreSQL, Docker, Prisma ORM, SQL.

DevOps & Quality: Git, GitHub, CI/CD Pipelines, Jest (Unit Testing), React Testing Library, Agile/Scrum.

WORK EXPERIENCE

LITEBOX (DIGITAL AGENCY) — **Remote**
Frontend Developer — **Feb 2026 – Present**

- **CodSpeed Marketing Site (zero to production):** Built the entire site from initial architecture to production launch, working directly with the client's team. Developed a Tailwind CSS v4 design system (@theme tokens and @layer components abstractions) on Next.js 15, and implemented pixel-perfect components from Figma, animated SVG effects, and Lottie animations layered over interactive HTML elements.

- **Workada Website (zero to production):** Developed the full frontend from initial setup to production deployment on Vercel, including sections such as a reviews page with a testimonials carousel.
- **Clerk – Product Modules:** Developed the product module for the UserButton and UserProfile components on the website of Clerk, a leading authentication and user management platform.
- **Technical SEO:** Ran a full SEO audit and remediation (heading structure, H1s, meta descriptions, alt text, schema markup) and contributed to the client's SEO/GEO/AEO audit and Next.js App Router migration proposals.
- **AI-Assisted Development Tooling:** Designed internal workflows with Claude Code and MCP integrations (ClickUp and Figma) that turn tickets into structured execution plans, reducing friction between design, project management, and development across the team.
- **Team Processes:** Created ClickUp ticket templates and conventions, and adopted parallel development with git worktrees to handle multiple tickets in isolation.

Technologies: Next.js, React, TypeScript, Tailwind CSS v4, Lottie, Figma, ClickUp, Claude Code, MCP, Vercel.

ELITE APARTMENTS (RENTADIARIO) **On-site**
Full Stack Developer **Dec 2022 – Jan 2026**

- **Booking Engine Architecture:** Designed and engineered a proprietary "Real-Time Host Calendar" handling complex logic for dynamic pricing. This eliminated reliance on third-party SaaS, saving the company $4,000 USD annually.
- **Component Library System:** Created a reusable internal Component Library using TypeScript and Tailwind, ensuring UI consistency across the platform and accelerating feature development.
- **Shared Component Architecture:** Architected a scalable **internal UI library** used across the platform to improve team velocity and ensure design consistency between Buyer and Seller portals.
- **Performance Optimization:** Diagnosed rendering bottlenecks and implemented strict memoization strategies (React.memo, useMemo), improving UI fluidity on mobile devices by 40%.
- **Infrastructure & Data:** Collaborated on database schema design in PostgreSQL, optimizing queries for faster data retrieval in high-traffic endpoints.
- **Fintech Integration:** Spearheaded the secure integration of multiple payment gateways (Stripe, PayPal, PSE) and automated payout logic using Node.js scripts.
- **Code Quality:** Maintained high code standards by implementing **Unit Testing with Jest** and participating in code reviews.

Technologies: React, Next.js, TypeScript, Redux, PostgreSQL, Strapi, Stripe API, Jest.

ILLUMINATO LIVE (BALLERSONLY) **Freelance**
Frontend Developer **Oct 2025 – Dec 2025**

- **Dynamic Pricing Logic:** Developed an advanced quoting engine for a luxury marketplace, adjusting prices in real-time based on seasonality.
- **Payment Security:** Executed the migration of the checkout flow to Authorize.net, ensuring compliance with banking security standards.
- **UX Optimization:** Redesigned the "Request to Book" flow, simplifying critical steps which increased the conversion rate for luxury rentals.

Stack: Next.js, React, Tailwind CSS, Shadcn, Zustand.

MIGUEL RUZ **Freelance**
Full Stack Developer **Dec 2021 – Oct 2022**

- **Database Architecture:** Designed Entity-Relationship models and deployed databases in PostgreSQL, ensuring data integrity.
- **Backend Development:** Built server-side logic using Next.js and Prisma ORM.
- **UI Implementation:** Developed complex interfaces and administrative dashboards using Chakra UI and TypeScript.

Technologies: React, Next.js, TypeScript, Redux, Chakra UI.
